

German Statistical Society

In order to promote outstanding young scientists, the Executive Board of the German Statistical Society awards the

Wolfgang-Wetzel-Price of the DStatG

for the year 2023.

The price is named after the former chairman of the DStatG, who was particularly committed to strengthening mathematical-statistical methods in society during his term of office. **The price is endowed with 1,000 €.**

The price is aimed at young scientists up to a maximum of five years after their doctorate. The price is awarded for an outstanding contribution to statistical methodology and its application. The contribution to be awarded usually consists of a publication that has already been published or is at least accepted for publication. It is also possible to award prices for several publications written by different co-authors. In the case of co-authorships, the award may also be shared.

The publication (or publications) must have been published or accepted for publication in the year of the award or in the three preceding calendar years.

The nomination is made by a member of the DStatG. The proposed young researcher does not have to be a member of the DStatG. Self-proposals are not possible.

The price committee consists of Harry Haupt, Ostap Okhrin, Yarema Okhrin and Timo Schmid. **Proposals** can be submitted, **primarily in digital form (PDF)**, by

April 30th, 2023 to the

Deutsche Statistische Gesellschaft
E-Mail: post@dstatg.de

**Deadline extended until
May 14th, 2023**
